

WELCOME TO META NFT TRADE

www.metanfttrade.live

About Company

Welcome to the world's largest trading investment and trading platform creating a solution for dream millionaire by integration with blockchain.

We are delighted to have you as a valued member of our community. At META NFT TRADE, we are committed to providing you with the tools and support necessary to achieve your financial goals through our innovative META NFT TRADE platform.

Mission

At META NFT TRADE our mission is to empower our users by providing an innovative and secure platform that leverages advanced technology to maximize trading opportunities of arbitrage trading.

Vision

At META NFT TRADE we envision a future where financial empowerment is accessible to all. We aim to be the leading platform in arbitrage trading, renowned for our innovation, integrity, and user-centric approach.

What is an NFT

A Non-Fungible Token (NFT) is a unique digital asset that represents ownership or proof of authenticity of a specific item, whether digital or physical. Unlike cryptocurrencies such as Bitcoin or Ethereum, which are interchangeable (fungible), each NFT is distinct and cannot be replaced by another. This uniqueness is secured through blockchain technology, ensuring the NFT's provenance and ownership history is transparent and immutable.

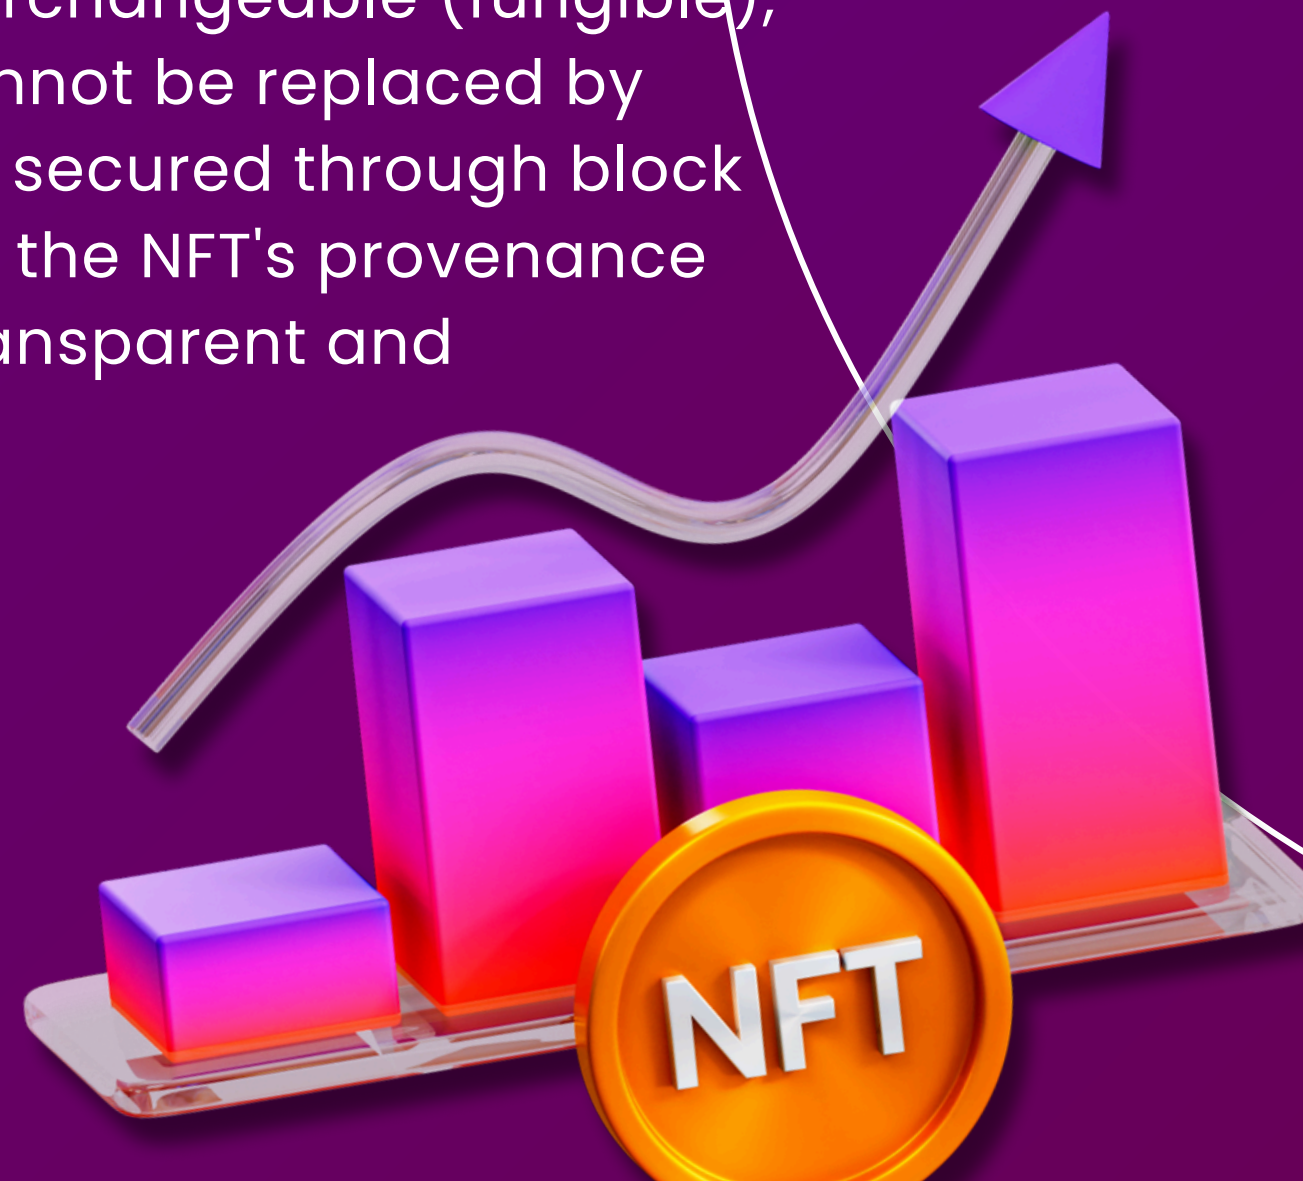

What is it

Uniqueness: Each NFT has a unique identifier, making it distinct from any other token.

Indivisibility: NFTs cannot be divided into smaller units; they exist as whole tokens.

Ownership and Provenance: Blockchain records the ownership history of NFTs, providing a transparent and tamper-proof record.

Interoperability: NFTs can be bought, sold, and traded across various platforms that support the same standards.

Use cases of NFT

Digital Art:

Artists tokenize their work, allowing buyers to own a verified piece of digital art.

Collectibles:

Digital collectibles, such as trading cards or virtual pets, are popular NFT applications.

Music and Videos:

Musicians and filmmakers release exclusive content as NFTs, offering fans unique access.

Virtual Real Estate:

Virtual worlds and games use NFTs to represent ownership of virtual land and assets.

HOW NFTs WORK

NFTs are typically built on block chain platforms that support smart contracts, such as Ethereum. These smart contracts define the rules and properties of the NFT, including its uniqueness and ownership rights.

When an NFT is created (minted), it is assigned a unique Identifier and metadata that link it to the specific asset it represents.

This information is stored on the block chain, ensuring its authenticity and ownership history is transparent and secure.

WHAT IS FUTURE OF NFT

We're constantly evolving — with future drops, DAO governance, token launches, and full metaverse expansion on the horizon. NFT isn't just a platform. It's a movement toward a truly decentralized, creative, and immersive digital universe.

THE PROBLEM IN THE NFT MARKET

Environmental Impact: The energy consumption of block chain networks, especially those using proof-of-work consensus mechanisms, has raised concerns about the environmental impact of NFTs.

Market Volatility: The NFT market has experienced significant fluctuations, with some assets appreciating rapidly in value, while others have seen substantial declines.

Legal and Regulatory Issues: The classification of NFTs under existing legal frameworks is still evolving, with ongoing discussions about intellectual property rights and securities regulations.

WHAT IS META NFT TRADE

META NFT TRADE PLATFORM is an innovative platform dedicated to NFT voting, allowing users to engage in daily voting on various NFTs. The voting process is facilitated by our trusted partners, OpenSea, Element Market and many more, ensuring a secure and transparent experience.

META NFT TRADE UNIQUE SOLUTION

META NFT Trade company can generate revenue through various methods depending on its business model, target audience, and value proposition. Here are several ways an NFT company can make money.

HOW META NFT WORK

A META NFT Trade is a company revolutionizes digital ownership by creating, voting, and authenticating unique blockchain-based NFT, empowering creators and collectors in art, gaming, and the metaverse. Our expertise drives innovation and success in the NFT space, empowering creators, businesses, and collectors with cutting-edge solutions:

NFT Creation and Tokenization

Marketplace Development

Global Business Opportunity

REVENUE SOURCES OF THE META NFT TRADE PLATFORM

COMPREHENSIVE INCOME PLATFORM

META NFT Trade is the world's first comprehensive NFT trading platform based on algorithm trading. The platform takes NFT crypto asset trading as the core to build a comprehensive income platform. Through the innovative pooling algorithm trading mode, it has pioneered the industry and given liquidity to every NFT asset.

OPEN ECOLOGY

At the same time, META NFT Trade is an open ecology. Through decentralization, the profits and profits generated by pooling are shared with all participants, fully encouraging participants to contribute to the open network and realizing an ecological win-win situation.

HOW TO EARN INCOME ON THE META NFT TRADE PLATFORM

META NFT Trade Platform is an open network ecosystem, and the revenue distribution of the platform favors users and community contributors, which makes it possible for more players to participate in earning revenue. In META NFT Trade platform, you can earn revenue in the following ways:

Participate in pooling trading

Build an influence contribution network

Participate in other sectors or activities launched by the platform

THE REVENUE SOURCE OF THE PLATFORM

- **COMMISSION INCOME**

The META NFT Trade platform charges a certain fee from NFT transactions, including purchases, sales, auctions, and transfers of NFT. These fees are usually calculated on a percentage basis and become an important source of revenue for the platform.

- **MARKETING COOPERATION**

META NFT Trade builds partnerships with NFT projects and NFT creators to promote their unique NFT collections and projects. These partnerships charge a fee or a revenue share, which brings additional revenue to the platform.

- **NFT casting fee**

Platform users usually have to pay a fee to mint a new NFT. TreasureNFT earns a portion of the revenue from these foundry fees, especially for unique or high-value NFT.

- **Licensing fee**

META NFT Trade can license its NFT technology and platform to other projects or platforms for a certain license fee. This way, the platform's technology and ecosystem can be promoted to other fields.

- **NFT collectibles for sale**

The META NFT Trade platform creates and sells NFT collections, similar to collaboration projects. Selling these unique NFTs can bring in revenue and increase the visibility of the platform.

- **NFT consulting and evaluation services**

Platforms can offer NFT consulting and evaluation services that help users assess the value of their NFTs and provide buying recommendations. These services typically earn revenue in the form of consulting fees or commissions.

The META NFT Trade platform creates and sells NFT collections, similar to collaboration projects. Selling these unique NFTs can bring in revenue and increase the visibility of the platform.

CENTARLIZED VS DECENTRALISED CURRENCY

CENTARLIZED CURRENCY

- It is in the hands of the Government.
- The government can close the currency whenever it wants.
- The government can change whenever it wants.
- Its price remains the same as the quantity a person has.
- Centralized Currency Example: \$, £, Rupee

DECENTRALISED CURRENCY

- No government or individual has control over it.
- No government of any country can stop it.
- No changes can be made here even if you wanted to.
- It's price can change anytime.
- Decentralized Currency Examples- BTC, Matic Various.

WHAT IS SMART CONTRACT

Program that automatically executes the terms of an agreement between two parties.

How it works?

Smart contracts are stored on a Blockchain, a distributed database that records transactions and cannot be changed. When a condition is met, the smart contract is executed, and the results are recorded on the Blockchain.

Automate Agreements

Smart contracts can automate the execution of an agreement, such as a mortgage transaction, without the need for an intermediary.

Improve Traceability

Smart contracts can improve traceability by recording every step of a product in a supply chain.

WHAT IS BLOKCHAIN

A blockchain is a kind of database. A database is a collection of information that is stored electronically on a computer system.

Information or data, in databases is typically structured in table format to allow for easier searching and filtering for specific information. What is the difference between someone using a spreadsheet to store information rather than a database? Spreadsheets are designed for one person or a small group of people, to store and access limited amounts of information. In contrast, a database is designed to house significantly larger amount of information that can be accessed, filtered and manipulated quickly and easily by any number of users at once.

ROADMAP

1

Platform Development & Smart Contract Integration

- Develop the core META NFT TRADE marketplace.
- Implement smart contract-based NFT trading for security and automation.
- Conduct rigorous testing to ensure a seamless user experience.

2

NFT Marketplace Launch & Community Growth

- Officially launch the META NFT TRADE platform.
- Introduce the first set of fixed-revenue-generating NFTs.
- Kickstart community-building initiatives, partnerships, and early marketing campaigns.

3

Advanced Trading Features & Liquidity Pools

- Implement algorithmic trading features for enhanced NFT liquidity.
- Launch NFT liquidity pools, allowing users to earn passive income.
- Expand staking and reward mechanisms for users and contributors.

4

Multi-Chain Expansion & Cross-Platform Compatibility

- Integrate multi-chain support, allowing NFTs to operate across different blockchains.
- Partner with leading blockchain projects for cross-platform NFT compatibility.
- Enhance security measures and optimize transaction efficiency.

ROADMAP

5

Coin Launch & Global Marketing Expansion

- Official launch of META NFT TRADE's native coin for ecosystem transactions.
- Host a grand Coin Launch Party with key industry leaders, influencers, and partners.
- Execute large-scale global marketing campaigns to drive adoption.

6

DeFi & Yield Farming Integrations

- Introduce DeFi features, including NFT staking and yield farming.
- Develop lending and borrowing mechanisms using NFTs as collateral.
- Enhance user rewards through integrated Defi pools.

7

Large-Scale User Adoption & Institutional Partnerships

- Expand institutional partnerships to bring real-world assets into
- META NFT TRADE Implement AI-driven NFT valuation and recommendation systems.
- Scale up platform capacity to handle mass adoption.

8

META NFT TRADE Metaverse & Web3 Ecosystem Development

- Develop META NFT TRADE's own metaverse for interactive NFT trading.
- Expand into Web3 gaming, VR, and AI-powered NFT experiences.
- Establish META NFT TRADE as the leading all-in-one NFT trading ecosystem.
